

SANOSEALED

These premises have been
DISINFECTED AND
ARE GERM FREE
using SANONDAF SOLUTION

FARMING

Keep your livestock free from harmful viruses & bacteria

Sanondaf solution is the simple answer to destroying 99.99% of harmful bacteria, viruses, fungi, moulds and yeast, in fact any microorganism susceptible to H2O2 (HYDROGEN PEROXIDE) and Silver. We have a number of case studies that prove the efficacy of our technology against Staphylococcus (incl. MRSA), Enterococcus (incl. VRE), H5N1, H1N1, Legionella, Aspergillus niger, Candida albicans and many other types of microorganisms.

Now with Sanondaf there is a cost effective and convenient way to ensure that harmful germs are not spread. Sanondaf is ideal for surface disinfection and aerosol treatment.

What are the advantages of using Sanondaf?

Sanondaf requires no rinsing and no wiping. Simply Spray and walk away. Therefore Sanondaf is the preferred disinfectant for pre-cleaned surfaces and supplemental area disinfection.

Does Sanondaf kill H1 N1 Swine Flu Virus?

Yes, Sanondaf is independently tested and approved to kill the H1N1 Swine Flu Virus. Sanondaf is also effective against mutating viruses because it works in three ways to kill microorganisms. Other leading disinfectants kill in only one way making them ineffective against mutating viruses.

Sanondaf can be used to disinfect:

- ✓ Cow Farms
- ✓ Horse Stables
- ✓ Pig Farms
- ✓ Poultry Farms
- ✓ Animal Hospitals
- ✓ Vet Clinics
- ✓ Animal & Bird Parks

Sanondaf Kills 99.99% of:

- ✓ Staphylococcus aureus
- ✓ Pseudomonas aeruginosa
- ✓ Mycobacterium smegmatis
- ✓ Candida albicans
- ✓ Bacillus subtilis
- ✓ Enterovirus Polio 1
- ✓ Aspergillus niger
- ✓ Acinetobacter
- ✓ Orthopox Virus
- ✓ Mycobacterium Tuberculosis
- ✓ Legionella Pneumophila
- ✓ Clostridium Difficile souche 027
- ✓ H1N1
- ✓ H5N1
- ✓ MRSA

Safe & Effective

The latest generation of SANONDAF touch-less disinfection solutions combines the effects of SanoFog and SanoChem. The dual effect of the SanoFog Machine and SanoChem enables the air and the surface in a room to be disinfected automatically.

SanoChem is a patented, highly effective, oxidizing disinfectant that kills 99.99% of all hazardous germs and bacteria without posing any threat to humans and animals.

The SanoFog Machine was developed around a heating and ionizing turbine that sprays the SanoChem liquid transformed into dry fog.
