

HOSPITALITY

Keeping your guests, customers & staff healthy

Hotels are always striving for maximum capacity. Therefore, the same hotel room will be used by numerous and varied clients in a single year. Due to this diversity, hotel rooms contain an enormous amount of bacteria and germs. It should also be added that some rooms may keep a trace of some clients (cigarettes, etc). An efficient disinfection will first ensure that the new patron finds a healthy environment, and that at the same time unpleasant smells have been eliminated.

Consumers rank the cleanliness and safety of a facility as the top two concerns when choosing where to spend their time and money.

Time Is Money

You need to be able to provide your guests with the comfort of knowing that their room is clean and virtually germ free. Bathroom sinks, tub, shower and toilets are known harbingers of infection germs but most people never consider the remote control. Microbiology studies indicate that the remote is almost always the most germ-laden surface in the entire room! Sanondaf touch-less disinfectant solutions allow you to sanitize virtually any surface in a guest room and can be used on 'hot spot' surfaces when other products cannot, such as:

TV REMOTE

TELEPHONE

FURNITURE

BED SPREADS

BATHROOM FIXTURES

DOOR HANDLES

CARPETS

LIGHT SWITCHES

Your Reputation

People's Choice

Your customer's word of mouth is the most valuable form of advertising you have. Sanondaf gives you the tools to protect their environment and the confidence to assure your guests well being. Germs can spread through common areas with a single touch. Influenza, Staph, Strep, MRSA and colds can cripple any major hospitality facility in a matter of days. Halt the spread by using Sanondaf in high-traffic areas such as:

- ✓ Lobbies
- ✓ Conference Rooms
- ✓ Break Rooms
- ✓ Guest Rooms
- ✓ Workout Facilities
- ✓ Restrooms
- ✓ Spas
- ✓ Restaurants

Get the competitive advantage of a healthy environment by using Sanochem, a patented, highly effective, oxidizing disinfectant that kills 99.99% of all hazardous germs on contact before the germs spread to other surfaces and your guests.
